

EDITORIAL

Dear Readers,

It is with great pleasure that I present this issue of our Journal of Oral and Maxillofacial Pathology. The field of oral and maxillofacial pathology continues to evolve rapidly, driven by advances in molecular diagnostics, digital pathology, artificial intelligence, precision medicine, and interdisciplinary collaboration. As custodians of scientific knowledge, we have a collective responsibility to foster innovation while upholding the highest standards of academic integrity. Our journal remains committed to serving as a trusted platform for disseminating impactful research that enhances diagnostic excellence, improves patient care, and contributes to the advancement of oral healthcare across the globe.

The strength and credibility of any scientific journal lie in the quality of the work it publishes. High-quality, evidence-based research not only expands our understanding of disease processes but also guides clinical decision-making, shapes future research, and influences education and policy. We encourage researchers and clinicians to submit original, ethically conducted, and methodologically sound studies that address relevant scientific and clinical questions. By prioritizing novelty, scientific rigor, and transparency, we can collectively strengthen the body of evidence that advances our speciality and inspires future generations of oral pathologists and researchers.

I extend my sincere gratitude to our authors for entrusting us with their valuable research and scholarly contributions. My heartfelt appreciation goes to our dedicated reviewers, whose expertise, thoughtful critiques, and commitment to maintaining scientific excellence ensure the integrity and quality of every published article. I also thank our editorial board for their unwavering support and guidance throughout the publication process. Finally, I express my deepest appreciation to our readers, whose continued interest, constructive feedback, and engagement motivate us to continually improve the journal. Together, let us continue to promote excellence in research, encourage meaningful scientific dialogue, and advance the science and practice of oral and maxillofacial pathology for the benefit of our profession and society.

Warmest regards,

Dr Varun BR, MDS, PhD, AAID (USA),
FICOI (USA), FIAOI (India), FIAOMP (India)
Editor-in-Chief
Oral and Maxillofacial Pathology Journal
