Oral & Maxillofacial Pathology Journal

1. Aims and Scope

Oral and Maxillofacial Pathology is a peer-reviewed journal, that focuses on diseases affecting the oro-facial and related head & neck regions. Published two times a year, it covers a spectrum of articles which include:

a) High quality original research, clinical trials and experimental studies (in vivo and in vitro), pertaining to the specialty. Hypothesis driven research works with significant positive/negative results are encouraged.

b) Comprehensive and insightful reviews and mini-reviews of literature pertaining to topics related and relevant to the specialty.

c) Reports of cases which maybe rare in occurrence or show an uncommon presentation. Cases that provide a novel outlook on etiology, pathogenesis, clinical presentations, histopathology, diagnosis and/or treatment of disorders, are encouraged.

d) We also publish letters to the editor, short communications, book reviews and photomicrographs and images of interesting cases.

The journal provides a forum for discussion and publication of topics related to the fields of Oral and Maxillofacial Pathology, Oral Microbiology, Oral Medicine and Radiology, Oral and Maxillofacial Surgery, Oral Oncology and Forensic Dentistry. It also publishes relevant articles on general pathology, microbiology, oncology, dermatology, oto-laryngology, gastro-enterology, biochemistry, genetics, immunology and hematology.

This publication is of interest to oral and maxillofacial surgeons, head and neck surgeons, oral medicine and radiology specialists, pathologists, specialists in forensics, general dental practitioners, dental care professionals, special care dentists, oto-rhino-laryngologists, radiation and medical oncologists, physicians, nurses, radiologists as well as others interested in these fields.

2. Ethical considerations

Manuscripts submitted for publications must follow ethical considerations. Informed consent must be taken from patients wherever applicable as per the consent form available in this journal.

Informed Consent

Informed consent of the patients must be taken before they are considered for participation in the study. Patient identifying information, such as names, initials, hospital numbers or photographs should not be included in the written descriptions. Patient

consent should be obtained in writing and archived with the authors.

Protection of Human Subjects and Animals In Research

When conducting experiments on human subjects, appropriate approval must have been obtained from the relevant ethics committees. All the procedures must be performed in accordance with the ethical standard of the responsible ethics committee both (institutional and national) on human experimentation and the Helsinki Declaration of 1964 (as revised in 2008). When reporting experiments on animals, authors must follow the institutional and national guidelines for the care and use of laboratory animals.

3. Copyright

The following guidelines must be followed before submission of the manuscript:

The author warrants that the work/contribution is an original research material and has not been published before and should not be under consideration of publication elsewhere except for previous publication in form of an abstract or as part of published literature (review or thesis) as may be included with the written permission of copyright owners. The author further warrants that the work/contribution (i) is not subject to any prior claim, encumbrance or agreement, (ii) will include appropriate warnings of harmful instructions, formulas and procedures, and (iii) will not contain any material that violates any copyright, personal proprietary or other right. This exclusive grant of rights under this Agreement means that the author may not delegate, assign, sub-contract or license the work/contribution in whole or part to third parties without prior written consent of the Publisher. If the work/contribution contains extracts or material from other copyright works, the author will obtain, at their own expense, before a paper can be considered for publication along with written permission, which shall be forwarded to the Publisher on delivery of the work/contribution from each copyright holder to use and reprint such material in all versions, forms and media now or hereafter known including all existing and future copy right and any renewals and extensions thereof anywhere in the world. Furthermore, the author will identify such material (if any) in the work/contribution and provide full and appropriate acknowledgement of its source. If such permissions are not obtained in a timely manner, the author will provide substitute material, revise the work/contribution accordingly and obtain the requisite substitute permissions, if necessary. If relevant, the author will obtain medical patient releases from patients if information about them or illustrations of them are used in the work/contribution.

Once the corresponding author has signed the Copyright Transfer form, the KSOMP would accept no change in author-

ship or in the order of the authors listed in the work /contribution. Also by signing the concerned form, the author reassigns the rights of co-publishing, or translation, including the digital rights, if considered necessary in future to the KSOMP.

While all care has been taken to provide accurate and correct information in accordance with the date of publication, neither the authors, editors nor publisher takes any legal responsibilities for any unintentional omission or error. The KSOMP makes no expressed or implied warranty with respect to the information contained herein. The published material cannot be photocopied for the following purposes: general distribution, promotion, new works or resale. If this is required, specific written permission requires to be obtained from the Publisher. Exclusive rights to reproduce and distribute the articles in this journal have been protected by copy right. This also covers the rights to reproduce or distribute the articles as well as the translation rights. No material published in this journal can be reproduced in digital format or stored in form of electronic databases, video disks, etc without the prior permission from the KSOMP.

4. Subscription and Publication charges

ISSN 0976-1225

eISSN 2322-0384

• Subscription rates

Annual Subscription:

Individual: Rs 4000.00 (National)
\$ 200.00 (International)
Institutional: Rs 6000.00 (National)
\$ 350 (International)

• Publication charges

KSOMP Members: Rs 4000
+ Rs 1000 for colour images

Non-KSOMP Members: Rs 6000
+ Rs 1000 for colour images

International Authors: US \$ 165

Both KSOMP and Non-KSOMP Members)

EDITORIAL

Dear Readers, Colleagues, and Esteemed Contributors,

I am both honored and thrilled to present to you the first issue of the Oral and Maxillofacial Pathology Journal, under my tenure as the Editor-in-Chief of this prestigious journal. As we embark on this exciting journey together, I would like to take a moment to reflect on the significance of this endeavor, the challenges we face, and the bright future I envision for our community.

Oral and maxillofacial pathology sits at the intersection of dentistry and medicine, playing a crucial role in diagnosing and managing conditions that affect the tissues and structures of the oral cavity and facial region. It is a field characterized by its complexity and its profound impact on patients' health and quality of life. With that in mind, our journal aims to serve as a platform for researchers, clinicians, and educators to share their findings, experiences, and insights, fostering a collaborative spirit and advancing our collective understanding.

In this issue, you will find a curated selection of original research articles, case reports, and reviews that reflect the rich diversity of our field. From groundbreaking studies on the molecular pathology of oral cancers to innovative diagnostic techniques and treatment modalities, each contribution underscores the importance of rigorous scientific inquiry and clinical excellence. I am particularly proud of the interdisciplinary approach we've adopted, inviting experts from various fields to contribute and share their perspectives, thereby enhancing the robustness of our content.

As we move forward, I encourage all of you—clinicians, researchers, and students alike—to consider the Oral and Maxillofacial Pathology Journal as your journal. Your contributions are the lifeblood of our publication. Whether you are submitting a manuscript, participating in peer review, or simply engaging with the content, your involvement is vital to our journey. Together, we can create a vibrant community of scholars and practitioners who are committed to advancing the boundaries of knowledge in our field.

In closing, I would like to express my gratitude to the editorial board, reviewers, and authors who have worked tirelessly to bring this first issue to fruition. Your dedication and passion for the field are truly inspiring. I am excited about what lies ahead and look forward to growing this journal into a leading resource for oral and maxillofacial pathology.

Thank you for joining us on this journey. Let us illuminate the path ahead and inspire future generations of oral and maxillofacial pathologists.

Warmest regards,

Dr Varun BR, MDS, PhD, FIAOMP

Contents

ORIGINAL RESEARCH

- 1 **The effectiveness of deoxyshikonin as a treatment for oral squamous cell carcinoma via inhibition of the AKT1/mTOR signaling pathway: A combined bioinformatic analysis and experimental validation** 149
Selvaraj Jayaraman, Vishnu Priya Veeraraghavan
- 2 **Gingival Crevicular fluid levels of Myeloid related proteins (MRP's) 8/14, MRP8 and MRP14 in clinical periodontal health and disease-A cross sectional study** 157
Annie Kitty George, Sankari Malaiappan, Vivek Narayan, Selvaraj Jayaraman, Nidhita Suresh
- 3 **Prevalence of Oral Potentially Malignant Disorders and Oral Cancer Risk Among Industrial Workers in Guntur, Andhra Pradesh, South India: A Cross-Sectional Study** 163
Aparna Kokode, Kiran Kumar Kattappagari, Akshitha Konki, Lakshmi Balraj, Pooja Kunjan, Venkat Ramana Reddy Baddam
- 4 **Clinico-Pathological Evaluation of OSCC and OPMD Biopsies - A 5-year Cross Sectional Retrospective Study in a Single Academic Dental Center** 170
Kavya Dharmaraj, Gheena S. M Rajkumar, KC Vignesh, S Revathi, Akila Ganesh, P Kennedy Kumar, S Vijayanirmala
- 5 **An in Vitro Investigation of the Effectiveness of Household Decontaminants for Toothbrushes** 176
M Rajkumar, KC Vignesh, S Revathi, Akila Ganesh, P Kennedy Kumar, S Vijayanirmala
- 6 **The Anticancer Effect of Allium Sativum & Foeniculum Vulgare Extracts in Combination on Oral Squamous Cell Carcinoma Cell Lines: An In Vitro Study** 180
Vishnudas Dinesh Prabhu, Shashikanth Hegde, Riaz Abdulla, Ashwini Prabhu, Rachana V Prabhu, Shivaleela Biradar
- 7 **Prevalence and factors contributing to temporomandibular joint dysfunction in the population of Makhachkala, considering postural disorders and psychoemotional stress. A cross-sectional study** 185
Visampasha Yusupovich Khanaliyev, Abusupiyan Butashevich Il'iasov, Safiya Isayevna Osmanova, Ayza Budayevna Sheykhmagomedova, Sabina Tagirovna Guseynova, Gasan Magomed-Alievich Budaichiev
- 8 **Radiographic study of Mental Foramen characteristics and its relation with gender among the South Indian adult population** 190
G Kartheek, K V Chalapathi, Ravikanth Manyam, Swetha P, Smita Birajdar, A Naga Supriya
- 9 **Comparison of PAP and Giemsa stain for determination of Barr bodies in transgender patients** 196
Sindhuja A S, Revathi.U, Sai Lakshmi L.J., Nadeem Jeddy
- 10 **Inhibitory activity of green tea and Black tea on Streptococcus mutans – A preliminary study** 202
Sai Chinmaye Perumalla, Poosarla Chandrashekar, Vatsalya Kommalapati, Kiran Kumar Kattappagari, Lalith Prakash Chandra, H Aparna Latha

- 11 **In vitro evaluation of Tungsten oxide decorated Hydroxyapatite membrane towards guided tissue regeneration with enhanced antibacterial efficacy** 206
Tahoor Taskeen L, Bargavi P, Gheena S
- 12 **Development and Validation of an Artificial Intelligence-Based Prediction Model for Early Detection and Prognostic Evaluation in Oral Oncology: A Pilot Study** 210
Vishnu Priya Veeraraghavan, Shikhar Daniel, Ravikanth Manyam, Pratibha Ramani, Amarender Reddy, Santosh R Patil
- 13 **Assessment of Oral Health Status and its Correlates in Coastal Region of Kollam District, Kerala** 217
R Rathy, Karthika P S, Arathy Vijayan, Devisree Naveen, Jayanthi P, Nripan. T
- 14 **Analysis of Polarization Colors and Collagen Fiber Thickness in Oral Submucous Fibrosis: Correlation with Different Chewing Habits** 223
Soniya Adyanthaya, Riaz Abdulla, Pushparaja Shetty, Shakil M, Urvashi Shetty, Audrey D'Cruz

CASE REPORT

- 15 **An Unusual Case of Non-Hodgkins Lymphoma: A Case Report** 229
Anjali Unnithan, Joseph Edward, Jayanthi P, Sankar Jayaram, Tasneem Shah
- 16 **Hemangioma of the Tongue in a 65-year-old Female: A Case Report** 232
